# Calimax **Bellina** Pellet Stove

**Variable colours and casings:**

- 1 ruby red      2 corncob yellow      3 night blue      4 magic silver
- 5 deep black      6 sand silver      7 light orange      8 pastel yellow

**Technical specifications of Bellina:**

	<b>5 kW</b>
Heat output:	2,5–5 kW
Height:	890 mm
Width:	480 mm
Depth:	430 mm
Weight, including casing:	115 kg
Room-heating capacity*:	up to 150 m <sup>3</sup>
Flue pipe connection:	Ø 80 mm
Fuel capacity:	12 kg
Burn duration**:	up to 20 Std.
Efficiency rating (overall efficiency)***:	90%
Efficiency rating (partiac load)***:	92%
Voltage rating:	230 V / 50 Hz
Power consumption (continuous operation):	30/70 W
Room thermostat:	built in
Ceramic ignition:	built in
Timer switch:	integrated
Permissible fuels: Low-dust wood pellets; ÖNORM M7135, DIN 51735, DIN Plus	

\* Room-heating capacity varies with the quality of heat insulation and amount of ventilation.  
 \*\* Burn duration varies with heat output and quality of fuel.  
 \*\*\* Determined during bench testing  
 Dimensional tolerances +/- 3mm.  
 We reserve the right to make changes.

Product subjected to type-approval testing at TÜV Süddeutschland, in accordance with ÖNORM: H3011, DIN 18891, EN 14785 and as per article 15a B-VG

Few manufacturers are capable of uniting design and function. We cannot separate them.

## Calimax Bellina Pellet Stove

Calimax offers, with the new Bellina pellet stove, a real attraction for the young and young-at-heart alike. For this compact model is designed specifically for single-person households, smaller flats and apartments. Bellina stands out thanks to its contemporary design details and fresh new colours. Refined: You can transform the look of your stove, as if by magic, with just a couple of simple operations. The coloured side panels are easy to remove and replace. Bellina's other big plus is its advanced technology, which includes an innovative control system designed to ensure maximum operating convenience. The Bellina pellet stove from Calimax.

Built-in cleaning brush.

The ultra-modern control system offers maximum operating convenience.

Combustion chamber with flame relief.

### Modern design:

Bellina enchants at first sight, because the balanced, clean forms of this compact pellet stove are designed to blend in with any lifestyle.

### Refined cover elements:

The Bellina side panels, which are specially coated to ensure maximum toughness, are available in eight different colours.

The trick: easy-to-replace side panels allow you to match the look of your Calimax pellet stove to any ambience.

### Innovative control system:

One outstanding innovation is the control system, which has been designed to ensure maximum operating convenience.

The futuristic-looking control unit, which is located on the top part of the stove, offers simple menu-based operation of all functions – making it particularly easy to operate and user-friendly.

### Practical details:

Integrated connection points for a vacuum cleaner and built-in brushes in the flue conduits make cleaning and ash-removal really easy.

### High efficiency of over 90%:

A rate of efficiency in excess of 90% offers absolutely top performance. Pellet combustion is guaranteed CO<sub>2</sub>-neutral, with emissions reduced to a minimum.

### Safe operation:

The Bellina pellet stove offer maximum safety, with a control system designed to shut down immediately at the first sign of any trouble.

### Cost-efficient servicing:

The Bellina can operate perfectly with very long cleaning intervals. And: A newly-developed design principle makes it possible to reduce servicing costs even further.

### High-performance construction:

Bellina pellet stoves are made of high-grade, robust cast metal to guarantee a long service life. A small but attractive detail: A flame relief is incorporated into the cast-iron combustion chamber.

### Individual subsidies:

The use of Calimax pellet stoves may be subsidised under certain circumstances. Subsidies depend on each user's local legislative and regulatory situation.

### Environment-friendly pellets:

Heating with pellets does not increase CO<sub>2</sub> levels in the atmosphere, thus helping to prevent the hazards of the greenhouse effect. Indeed a pellet stove is not just cost-effective, but also ecologically sound, because it actually protects the environment. Pellets are made of naturally-occurring waste wood. Wood pellets are free of chemical additives, and the lignin resin contained in the wood acts as a natural binding agent.
